Summary

Java Full-Stack Developer with 3+ years of experience in designing and deploying scalable web applications. Proficient in Java, Python, JavaScript, React.js, Spring Boot, and Node.js. Expertise in microservices architecture, AWS, Docker, Kubernetes, CI/CD pipelines, and distributed systems. Skilled in database optimization (MySQL, MongoDB), testing frameworks (Jest), and Agile methodologies. Skilled in delivering high-performance, secure, and scalable solutions while streamlining development workflows and improving team efficiency.

Education

Master Of Science in Computer Science California State University, Long Beach	GPA:4.0/4.0	Jan 2023 - Dec 2024
Bachelor of Technology in Computer Science Jawaharlal Nehru Technological University, India	GPA:3.5/4.0	Jul 2017 - May 2021

Skills

- **Programming Languages:** Java, Python, JavaScript, SQL,
- **Front-End Development:** React.js, HTML5, CSS3, JavaScript (ES6+), React Native, Expo
- **Back-End Development:** Spring Boot, Node.js, Express.js, OAuth 2.0, JWT, Hibernate, RESTful APIs.
- **Cloud & DevOps:** AWS (EC2, S3, RDS, Lambda), Docker, Kubernetes, Git, JIRA, Jenkins, Terraform, Bitbucket
- **SQL/NoSQL Databases:** MySQL, PostgreSQL, MongoDB
- **Testing & QA:** JUnit, Jest, Postman, JMeter,
- **Tools & Methodologies:** Visual Studio Code, Eclipse, IntelliJ, Android Studio, Artificial Intelligence/Machine Learning, CNN, DevOps, CI/CD, SDLC, Agile methodologies, Scrum, Firebase, JSON, distributed systems, Wix Studio, Expo-Dev-Client
- **Certifications:** Oracle Certified Professional: Java SE 11 Developer, Microsoft MTA: Software Development Fundamentals

Experience

Tindoori Labs, USA

Feb 2025 - Current

Solutions Engineer Intern

- Contributed to end-to-end microservices architecture using **Spring Boot** and RESTful APIs, ensuring scalability and modularity for core business functionalities.
- Improved deployment efficiency by 20% by streamlining CI/CD pipelines using **Jenkins**, integrating automated testing frameworks like JUnit and Mockito.
- Configured and implemented a **React Native mobile application** using Expo, streamlined **build pipelines** with Expo managed workflow, **integrated payment** Options and **push notifications**, enhancing user engagement by 25%.
- Developed dynamic user interfaces with **React.js** and **Redux**, enhancing frontend performance by 15% and reducing client-side latency and Secured API integrations using **JWT** and implemented encryption protocols
- Conducted **performance tuning** of backend processes and MySQL queries, achieving a 15% reduction in query execution times.
- Designed and implemented an end-to-end **messaging and notification system using STOMP**, handling approximately 10,000 messages daily with a high delivery and read receipt success rate, resulting in a 15% increase in user engagement

Honeywell Internationals, Bangalore, India

Sep 2021 - Dec 2022

Application Developer

- Developed 20+ reusable UI components with React Native, **Node.js**, and **TypeScript**, leveraging custom hooks and ES6+ features, reducing development time by 30% and improving code efficiency by 25%.
- Deployed applications using AWS **S3**, **RDS**, and **EC2**, implementing fault-tolerant architectures, increasing scalability by 35%, and reducing downtime by 40%.
- Improved API performance with **Redux-Saga**, enhancing state management and middleware processing, achieving a 99% API success rate and reducing response times by 20%.
- Applied Test-Driven Development (TDD) with **Jest**, achieving 20% fewer bugs in production and ensuring long-term code reliability.
- Optimized frontend load times by 25% using lazy loading, code splitting, and tree shaking, reducing bundle sizes by 20% for improved performance.
- Secured APIs using **JWT** authentication, **OAuth2**, and HMAC encryption, ensuring compliance with OWASP standards and reducing unauthorized access incidents by 15%.
- Conducted system profiling with Chrome **DevTools** and **Postman**, optimizing middleware latency by 10% and reducing SQL query execution times by 15%.
- Automated CI/CD pipelines with Jenkins, integrating **SonarQube** for static code analysis and Docker for containerized deployments, cutting deployment times by 20%.

Unitrans Infotech Services Pvt Ltd, India

Jan 2020 – Aug 2021

Associate Software Engineer

- Developed a secure online banking platform using **Spring Boot** and **React.js**, achieving a 95% reduction in unauthorized access incidents with Role-Based Access Control (**RBAC**) and **JWT**-based authentication.
- Optimized API response times by 30% by designing and implementing RESTful APIs using Spring Boot and integrating **Swagger** for documentation and testing.
- Integrated the bank's core banking system through secure **REST APIs**, improving real-time transaction processing speed by 40% and enhancing customer satisfaction.
- Enhanced database query performance by 25% through optimized indexing, use of Hibernate caching, and stored procedures in MySQL hosted on **AWS RDS**.
- Built and deployed a containerized microservices architecture using **Docker** and implemented CI/CD pipelines with Jenkins, reducing deployment time by 40% and Improved application availability to 99.99% uptime by leveraging **AWS EC2**, **S3**, and **RDS**.
